

Kairos Inkle Looms

Improved Form, Increased Function, AND aesthetics!

Yes, there are certainly other inkle looms you could consider buying – the same ones that typically match the original design from 90 years ago. But sometimes that ‘old way’ is not always the best way for weaving, and for your health. Our newly introduced Kairos Inkle Loom proves that point.

There are 16 improvements incorporated in our inkle loom that are not found on the old-style inkle looms typically for sale. One of the most important improvements is our ‘Fingers Free’ shed opener (patent pending) that removes the awkwardness of reaching into the warp threads to change the shed to pass the shuttle through.

Startling Fact

For every inkle loom, narrow band you weave that is 10 feet long, with 12 weft rows (picks) per inch, you will typically need to open the upper and lower sheds by hand this many times...

Each band woven - 1,560 times

1 band per week in a year - 81,129 times

1 band per day, in a year - 509, 400 times

Imagine an inkle weaver's cost in physical stress & strain if you were having to manually reach around and into the warp each and every one of those many thousands of times per year?

That is why Kairos Inkle Looms include our original *Fingers Free Shed Opener* on our own inkle loom - so **you do not have to put up with it!**

20% off for WWG Members only

Limited Time - Jan. 1, 2022 - Jan 30, 2022
